

OTEL
- <https://opentelemetry.io/>
- <https://opentelemetry.io/docs/collector/>

Sync Processor:
- Gets the API information from the database (that control-plane-api pushed) and see what is on Azure API Management to see if there are differences. If there are differences it fixes.

Control-Plane API:
- Onboard APIs from providers
- API Management (Teams, Products, Subscriptions, etc..)

Authorization Service:
- Validates if the user can access the API

BFF - Backend for Frontend (<https://learn.microsoft.com/en-us/azure/architecture/patterns/backends-for-frontends>)
